LATEST NEWS

An introduction

Eleventh Dimension is a new business that started in June 2007 to offer services for digital video and animation.

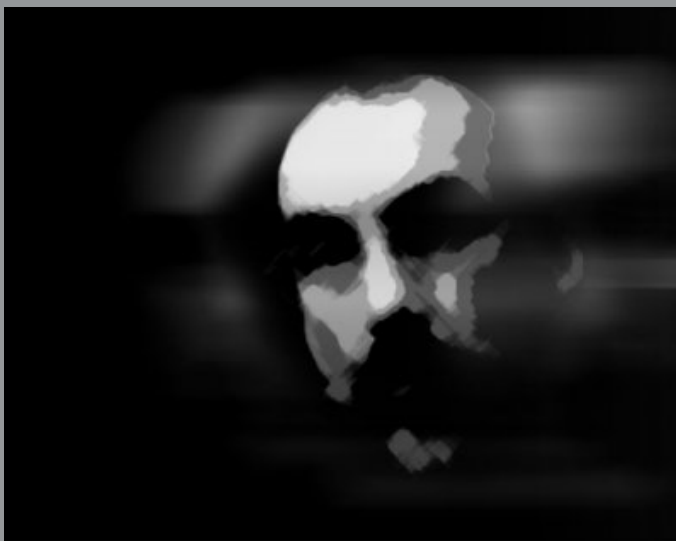

Hi, my name is Marcus McDermott and I am a digital artist who has lived in the beautiful Sidlaw Hills since 1980.

The main thrust of motivation is always the project. In other words, it is the execution of ideas and the emphasis on quality of workmanship and final outcome that are essential components for consideration in any projects I agree to undertake.

On offer are services for a range of digital media projects: 3d modelling and animation, camera work and non-linear video editing, compositing (i.e: blue/green-screen), interactive DVD authoring, Flash animation (the animated banner above for musical1.com is an example) and other forms of image/sound manipulation.

Examples of my work can be found on my video page and higher quality versions are also available as a free download from my vault. There is an interactive DVD showreel with more examples and information, including rates, just e-mail me your address and I will post a copy to you.

Thank-you for taking the time to read this and I hope you enjoy the video/animation.
All the best,
Marcus.
